STEP BY STEP GUIDE ABOUT ADDING YOUR DLT REGISTERED HEADERS & TEMPLATES TO YOUR 24X7SMS ACCOUNT

The aim of this document is to guide you through the process of adding your DLT approved Headers (Sender ID) & Templates (SMS Contents) to your 24X7SMS account.

Before proceeding further kindly make sure that you have the **correct Entity ID/Header ID/Template ID (if any)** & exact DLT Header/Templates **(it's case sensitive)**. Its users sole responsibility to make sure all the DLT details provided to us i.e. Entity ID, Header ID, Template ID etc. are 100% accurate, error free & exactly as it is as it is been approved at DLT portal as once messages are submitted to the operators it will be charged by them whether it is processed successfully or rejected or failed etc. at their end. Always test on sample numbers prior to bulk submissions to check everything is alright.

Adding DLT Approved Header (Sender ID)

Login to your 24x7sms account - PUSH SMS > DLT Approved Sender ID > Add New Sender ID

1. **Select Service** (i.e. Template, Promotional, Optin)
2. **Header Value** (i.e. 6 Character sender ID approved at operators DLT portal)
3. **Header DLT ID** (i.e. 19 digit header ID approved at operator DLT portal)
4. **DLT Entity ID** (i.e. 19 digit entity ID approved at operator DLT portal)
5. **Approved By Operator** (i.e. which operator has approved it e.g. Airtel, Vodafone, Jio)

Add DLT Approved Templates (SMS Content)

Login to your 24x7sms account - DLT Approved Templates > Add DLT Approved Template

1. **Select DLT Approved Header**
2. **DLT Approved Template Name** (i.e. template name which you have got approved at operator DLT portal)
3. **DLT Approved Entity ID** (i.e. your 19 digit Entity ID)
4. **DLT Approved Template I**D (i.e. 19 digit template ID which you have got from operator DLT portal)
5. **Communication Type** (i.e. Transactional, Service Implicit, Service Explicit or Promotional)
6. **Approved By Operator** (i.e. which operator has approved it e.g. Airtel, Vodafone, Jio)
7. **DLT Approved Content Template** (i.e. the SMS content with {#var#} which you have got approved at the operator DLT portal)
